GIANNI PILOTTI

Economics Student · Available for a 4–6 month internship
gianni.pilotti@gmail.com | linkedin.com/in/gianni-pilotti | github.com/gianni04

PROFILE

Final-year Bachelor student in Economics at the University of Luxembourg. Developed quantitative projects covering derivatives hedging across crypto and prediction markets, option pricing, and portfolio value-at-risk backtesting. AMF and BMC certified. Looking for a 4–6 month internship in market risk or finance.

EDUCATION

University of Luxembourg — Esch-sur-Alzette, Luxembourg
Bachelor in Economics — Sep 2023 – Jul 2027
Relevant coursework: Financial Markets, Corporate Finance, Macroeconomics, Econometrics.

University of Economics in Bratislava (EUBA) — Bratislava, Slovakia
Erasmus+ Exchange Semester — Sep 2025 – Jan 2026
Relevant coursework: Quantitative Methods, Public Finance.

PERSONAL PROJECTS

Binary Option Delta Hedging — github.com/gianni04/binary-delta-hedge

- Hedged Kalshi Bitcoin binary options with a Hyperliquid perpetual over 207 days, comparing a single strike with a strip of nine strikes: the strip cut daily P&L swings in half ($362 to $186).
- Rebuilt the same payoff with Deribit options: trading costs of $41 a day against $55 on Kalshi, mostly Kalshi's wider bid-ask spread. Kalshi caught up once its spreads narrowed.

Portfolio Value at Risk — github.com/gianni04/portfolio-value-at-risk

- Measured the daily risk of a multi-asset portfolio (European and US stocks, US Treasuries, Ethereum) with four VaR models.
- Annual volatility of 20.2%; on a 1-in-100 bad day the portfolio loses at least 3.4% (VaR 99%), and 4.8% on average in those cases (Expected Shortfall).

Option Pricing & Hedging — github.com/gianni04/option-pricing-python

- Built option pricing models in Python (Black-Scholes, binomial tree, Monte Carlo) and checked that they give the same price.
- Computed the Greeks to measure how an option reacts to the market, and priced American and barrier options.
- Simulated delta hedging and showed that adjusting the hedge more often makes it more accurate.

PROFESSIONAL EXPERIENCE

Proximus Luxembourg — Bertrange, Luxembourg
Summer Student — IT Systems & Infrastructure — Jul – Aug 2026

- Managed IT asset tracking and inventory across the department, ensuring data accuracy in internal systems.

VIRTUAL EXPERIENCES

Markets Sales & Trading Job Simulation — *Citi · Forage* — Aug 2026

- Prepared a morning market meeting and a weekly wrap-up, pitched a trade and hedged its risk.

LSEG Workspace Certification Assessment — *LSEG* — Aug 2026

- Certified proficiency in LSEG Workspace — industry-standard platform for market data, financial analysis, and risk metrics.

SKILLS

Quantitative Finance	Greeks, Options, Futures, Value at Risk, Delta Hedging, Backtesting.
Programming & Data	Python (NumPy, pandas, SciPy, Matplotlib, Plotly, pytest), Excel, VBA, Stata.
Software	Microsoft Office (Word, PowerPoint, Outlook), Claude Code.

CERTIFICATIONS

AMF (Autorité des Marchés Financiers) · Bloomberg Market Concepts (BMC) · Bloomberg Finance Fundamentals (BFF) · Bloomberg Spreadsheet Analysis (BSA) · Bloomberg ESG (Environmental Social Governance) Certificate

LANGUAGES & INTERESTS

Languages: French (Native) · English (B2/C1) · German (A2).
Interests: Macroeconomics, financial markets, geopolitics, travel, competitive esports (Rainbow Six Siege — in-game leader).
